

AVEDON & COLBY | SIGNATURE FIELD PANTS

A TEA-DYED BUSH POPLIN (A SIGNATURE FEATURE)

The Signature Field Pant is constructed of a 100% long-staple cotton bush poplin that's distinguished by its tight, compact weave of high-twist yarn. Softened with a lightly napped finish that won't weaken the fabric (unlike surface sanding, which abrades the weave and weakens the fabric), the inherent water repellency of the weave is further enhanced with a water-repellant finish.

B OVERSIZED CROTCH GUSSET

(A SIGNATURE FEATURE)

A unique 4-inch, seamless panel tapers gradually down the inside of each leg to just above each knee to eliminate binding and crotch seam irritation when climbing and hiking in the field.

C THREE ADJUSTABLE SIZES

The new Signature Field Pants come in Medium (32 - 34), Large (36 - 38) and Extra Large (40 - 42) sizes, and feature 2-button waistline tabs on each hip that allow easy adjustments for a perfect fit.

D SOFT WAISTBAND & FRENCH FLY

The pants feature a soft, comfortable waistband, full-length (7-inch) heavy-duty YKK brass zipper with hook and loop waist closure and a full French fly to remove stress on the zipper.

E CONTOURED FABRIC PANELS

(A SIGNATURE FEATURE)

Every panel in the seat, hips and legs is strategically contoured to allow maximum movement and comfort while maintaining a trim, stylish profile.

F OVERSIZED BELT LOOPS

Eight 2-inch belt loops include three "tunnel loops" at the side and center-back to help support belt-mounted camera cases, holsters or knives.

G EXTRA LARGE HIP POCKETS

Two 6 x 6 back hip pockets close with heavy-duty brass YKK zippers.

H EASY-ACCESS FRONT POCKETS

Both front pockets are 10-inches deep with an easy-access top opening.

I SIDE CARGO POCKETS

Two, highly functional side cargo pockets feature our Signature Tuck-In Flaps which are secured with two hidden buttons and can be tucked in with no puckering of the flap material. Rear-facing pleats permit full cargo expansion without catching on thorns and brush. No-rust thread grommets provide drainage.

Outer patch pockets accommodate a cell phone or compact GPS unit.

J ZIPPERED SECURITY POCKETS

Inner, hidden security pockets on outer legs close with heavy-duty brass YKK zippers, and open top, outer patch pockets accommodate a cell phone or compact GPS unit.

K HEAVY-DUTY POCKET CONSTRUCTION

The interior "bags" of every pocket are constructed from the same fabric as the pants for extreme durability.

L PANT LEG ABRASION PANELS

The back of each leg features 6-inch, 2-layer abrasion panel behind the heel for added durability and long life.

M BOOT ZIPPER

Each lower leg features an 8-inch out seam zippered opening with a cover flap and 2-position snap tab for easy removal of boots.

N HORN & UREA BUTTONS

Stronger and more durable than traditional horn buttons, the Signature Field Pant buttons are molded from ground horn powder and urea-methanol resin to withstand harsh washing on rocks (when on safari) or high-temperature commercial presses back home. Raised button rims protect the thread from abrasion.
